

INTERNSHIP PROJECT REPORT

Name: PONAMALA VARSHITHA

Internship Track: Frontend Developer Internship

Task Title: Task 1: Personal Portfolio Website

Live Hosted URL: <https://varshithaponamala12-netizen.github.io/My-portfolio/>

GitHub Repository: <https://github.com/varshithaponamala12-netizen/My-portfolio>

Project Description

This is a responsive Personal Portfolio Website built as the first core task for the internSpark Frontend Developer Internship. The goal of this project was to create a modern, multi-page professional website to showcase my development skills, project works, and technical proficiencies.

Tech Stack & Features

- **HTML5 & CSS3:** Built using clean, native web standards without external libraries for optimal loading speeds.
- **Responsive Design:** Fully optimized to scale beautifully across all devices, from mobile phones to desktop screens.
- **Multi-Page Layout:** Structured across clean, separate pages (index.html, About_me.html, projects.html, skills.html, and contact.html).
- **Live Deployment:** Natively hosted and deployed using GitHub Pages for real-time portfolio viewing.

File Structure Overview

- index.html — The main landing directory containing introductory layouts and the primary navigation architecture.
- About_me.html — Detailed biography component utilizing structured text and paragraph block alignments.
- projects.html — Layout view displaying completed code projects through flexible grid distributions.
- skills.html — Specialized structural overview using metric components to present technical competencies.
- contact.html — Interface form equipped with native layout input structures for secure data entry.
- style.css — Centralized global style module managing asset scaling reset frameworks, system-wide fonts, responsive breakpoints, and UI spacing parameters.
